FARM MANAGEMENT

Donkerhoek Data's Farm Management software package derives from the producer's need for a totally integrated and reliable system addressing the demand for traceability of all farming activities.

The latest technology and changing legislation drives regular updates. Farm Management is a cost effective, user friendly and practical farm management solution.

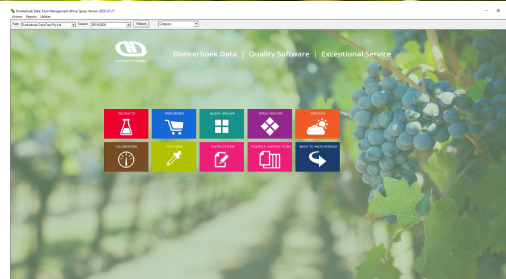

WE OFFER

- Regular training sessions at head office
- Regular updates via the web
- Comprehensive user manuals
- Exceptional support in English and Afrikaans

MODULE | MAIN

- Farm setup, Main- and Spray Blocks
- Stores setup
- Tractors, Spray Carts and Spreaders
- Suppliers

MODULE | SPRAY

- Records purchases, stock movement, cost and applications of chemical spray products.
- Create mixtures and calibrations for instructions.
- Insert and print Spray Instructions that comply with Nature's Choice and GlobalGAP's regulations.
- Manages withholding periods, IPW and IPM points.

MODULE | FERTILIZER

- Records purchases, stock movement, cost and applications of fertilizer products.
- Easy creation of fertilizer calibrations and instructions.
- Hand, airplane and irrigation applications also possible.
- Comply with regulations of Nature's Choice and GlobalGAP.

MODULE | INCOME

- This module calculates the income and production of blocks / cultivars / ha.
- Manage deliveries to pack sheds.
- Produce inputs according to size, grade, etc.
- Keep record of wastage. Wastage inputs can be allocated to hawkers.
- Make direct sales or sell packaged goods.
- Create 'loading documents' for export, invoices and manage payments.

MODULE | COSTING

- This module calculates the cost of each block / cultivar / ha.
- Setup methods of distribution to suit your needs.
- Import salary / wage detail directly from Donkerhoek Data's Payroll and allocate to blocks, cultivars or cost centres.
- Enter general and contractor invoices for distribution.
- Costs can be distributed to individual blocks or globally to a group.
- Reports will show costs recorded from other modules.

MODULE | PEST MONITORING AND PLANT ANALYSIS

- Create pest monitoring instructions and reports for a block.
- Graphic display of pest results.
- Leaf, fruit and soil analysis.

MODULE | ASSET

- Setup and record vehicle information
- Vehicle service history
- Manage fuel stock and purchases.
- Monitor fuel allocation and consumption of vehicles and tractors.
